Elliot Tanner – Stashed Owner | Engineer | Rider | Dad

## The Stashed Story

How to store more bikes in less space, without losing access?

This was the question Elliot Tanner, Founder of Stashed Products had been rolling around in his mind for some time. But when Elliot started a family and found that the space used to store bikes was suddenly compromised - he faced a choice - sell some bikes or design a better storage solution.

With a solid foundation in R&D, business and engineering, Elliot focused his energy on developing an innovative solution for storing and accessing bikes, saving up to 50% less space. The Stashed Sliding Bike Storage System was born.

The modular bike storage system allows more bikes to be stored in less space without losing access. Suitable for storing 1 to 24 bikes and built to withstand the toughest environments, its suited to home and commercial environments.

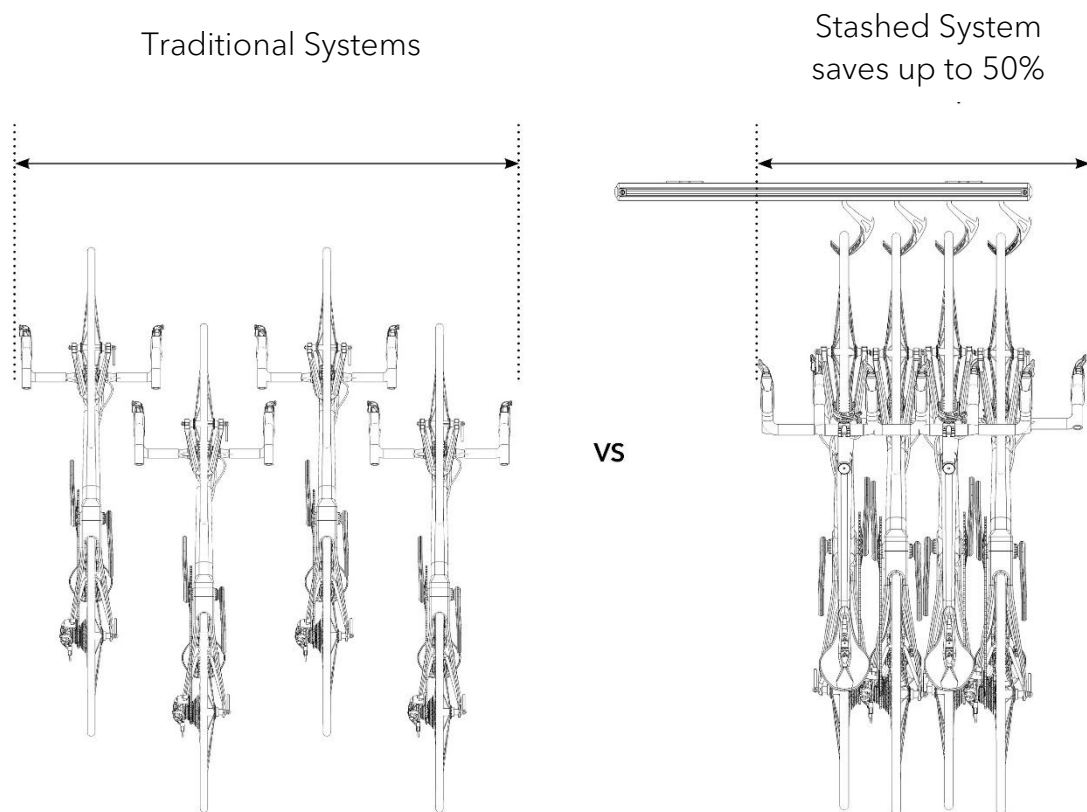

*"The response we've had to our bike storage system has been incredible – we've not stopped since we launched early in April 2022. I felt like I had designed a good quality product that solved a specific problem – but nothing prepared me for the overwhelmingly positive response we've had since we launched. We're currently experiencing success in the US market, and this is one of the areas we'll be developing during 2023."*

Elliot Tanner – Director of Stashed Products.

# What's so special about the Stashed Bike Storage System?

Since the original sliding ceiling mounted system launched in 2022 - Stashed has revolutionised bike storage for hundreds of customers and commercial clients around the world. Our modular Sliding Bike Storage System allows more bikes to be stored in less space, without compromising access.

Our system sets a new standard in bike storage design. The concept is simple - sliding and rotating hooks allow alternate bikes to be spun 180° and stored closer together, saving space, compared to similar systems. When it's time to ride, the smooth sliding mechanism and rotating hooks, make it easy to access your bike of choice. Our hooks are universal - designed to safely store every type of bike, with or without mudguards, including e-bikes. Beneath the clean lines and stylish exterior, you'll find the ingenious features that make our system unique - such as Auto Lock Tech, to stabilise unweighted hooks, so they don't spin or move when bikes are loaded. Built to look good and to last - modular design makes it easy to add more storage as your bike collection grows.

## Choose from three mounting options...

With three mounting options to choose from, we're confident customers can select a Stashed Bike Storage System that fits their available space. Simple to install and sold as kits that contain everything you need.

Angled Ceiling

Wall Mounted

Ceiling Mounted

*"Our mission to re-purpose, previously unused space to store more bikes in, continues with the launch of two new Stashed Bike Storage Systems. The new wall mounted system shares all the great features of our ceiling system and is just as easy to install. New, specially designed adapters, allow our sliding system to be installed on angled ceiling areas as well, giving customers even more ways to store more bikes in less space."*

Elliot Tanner - Director of Stashed Products.

### Our most popular combinations

**CEILING MOUNTED**  
4 Bike System - \$375  
8 Bike System - \$710  
12 Bike System - \$1,045

**WALL MOUNTED**  
4 Bike System - \$560  
8 Bike System - \$1,045  
12 Bike System - \$1,525

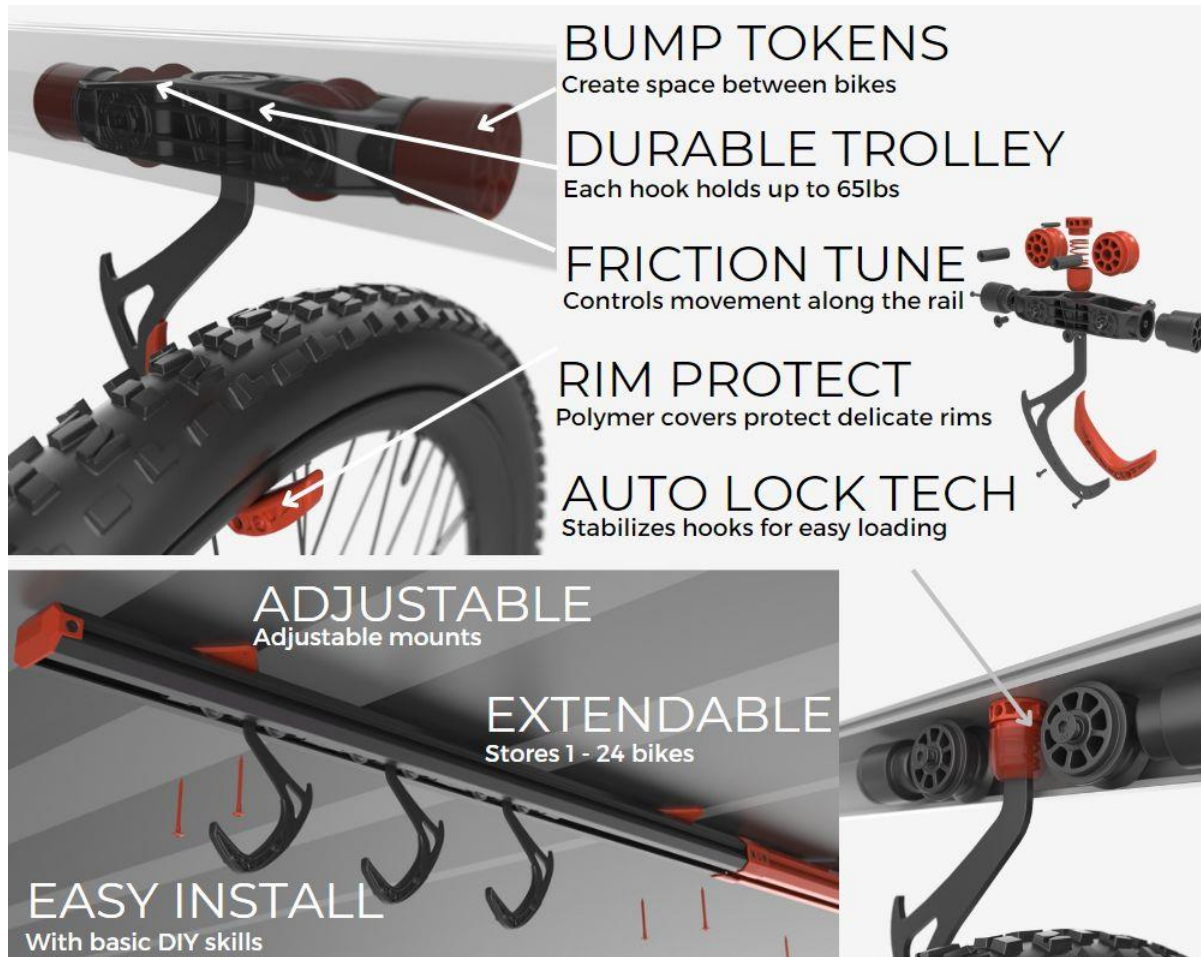

**ANGLED CEILING**  
4 Bike System - \$435  
8 Bike System - \$805  
12 Bike System - \$1,180

## Features

Stashed Sliding Bike Storage Systems are packed with useful features, designed to make storing and accessing your bikes a breeze. We know that your bike collection, whatever it's value, is worth a lot to you and we've spent time making sure our system doesn't just store your bikes, but protects them too.

## Stashed Tech – Engineered for Life

- Easy Load System with Auto Lock Tech
- 360° rotating stainless steel hook with protective polymer cover
- Store and access 1 to 24 bikes
- Universal hook holds all bikes up to 65lbs / 30kg (3" tyre max) including e-bikes, with or without mudguards
- Fat Tyre Adapter, available separately for 4" - 5" tyres
- Easy install with just four screws
- Each rail can hold up to 120kg / 260lbs and is 1196mm / 4ft long
- Hooks are rated to hold 30kg / 65lbs

## Stashed 360° Swivel Hook System

Our sliding hook, incorporates Stashed Products' patented auto-locking ball joint mechanism. This minimises the risk of any bike hanging fumbles, caused by unwanted movement or rotation of the hook.

Once weighted, the hook glides back and forth and rotates through 360° giving you easy access to your ride of choice. Suitable for all types of bikes, including e-bikes, road bikes and mountain bikes with tyres up to three inches wide.

Our **Fat Tyre Adapter** is designed to work with our hooks, for tyres between 4" - 5" wide.

Loading and unloading bikes is easy with our Auto Lock Tech mechanism, which prevents bike from moving along the rail when being loaded.

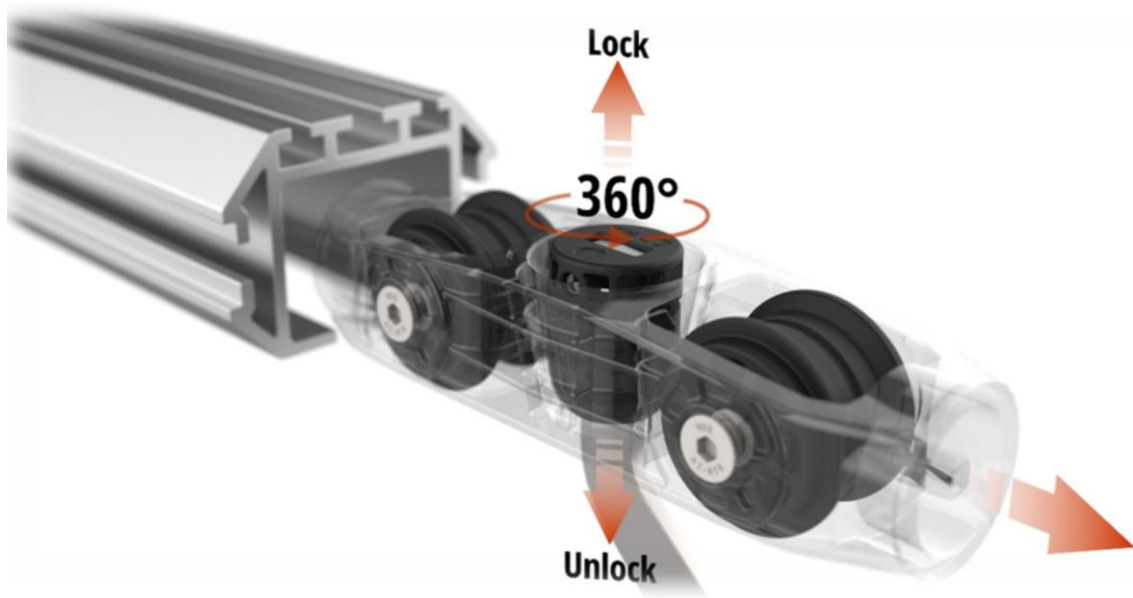

The polymer hook cover is designed to evenly spread the load, so bikes can be stored with confidence, without risking damage to delicate and expensive rims.

Rated to hold up to 65lbs per hook, its suitable for every bike, including E-Bikes.

## Auto Lock Tech for Easy Loading

Full 360° rotation of the hanging hooks is our 'not so' secret, space saving weapon. The ability to swivel bikes means more bikes can be stored safely, using up to 50% less space compared to similar systems.

Auto Lock Tech is designed for easy loading. When unweighted, the hook is held in a stable position, for easy loading and only moves along the rail once the bike is safely stashed. Simply hang, spin, slide, store - simple!

## Stashed Bike Storage - Commercial

Space saving flexible system that works as hard as you do...

Stashed Bike Storage Systems are built to last. They are robust enough to withstand the rough and tumble of busy workshops and commercial settings, backed up by our two-year warranty. Combined with standard racking systems - it's also possible to mount SpaceRail, internally without having to screw the system into ceiling joists or walls.

We've supplied systems to a broad range of commercial enterprises, including bike shops, workshops, hotels and lodges. One of our most recent installs was for YT Bikes at the YT Mill in Surrey, England.

Beautiful on the outside, tough on the inside - our systems are designed and tested in the lab to withstand use in busy commercial environments. If parts do need replacing, everything is available on our website, so you don't need to buy a whole new system, if parts accidentally sustain damage.

From designing and manufacturing in Wales, to ensuring our packaging is fully recyclable and doesn't contain any single use plastics. We may not be the cheapest, but for us, not costing the earth is at the heart of what we do. If your business values sustainability, you can rest easy that our products will sit well with your business's sustainability strategy.

## YT Bikes – Case Study

YT Bikes is a leading global direct to consumer bike brand that offers its customers a demo bike experience like no other.

But when you have over 100 bikes in your demo fleet, how do you store them effectively and efficiently? That's the problem we solved for YT.

Storing large numbers of bikes isn't easy. YT needed to minimise the risk of cosmetic damage to their fleet, and make sure that bikes weren't damaging the business environment around them.

Most importantly, bikes needed to be easily and safely accessed by YT employees, for demos and routine maintenance. As the YT warehouse already had good quality industrial racking installed - it was a relatively easy task to remove their makeshift system and install our sliding bike storage system - we simply bolted it on to the racking.

No drilling, no fixing to walls or ceilings and the ability to easily re-configure or move the racking within the warehouse if required.

YT made the most of their warehouse space immediately, without having to touch or alter any internal structures at all. A very real advantage for businesses who rent their warehouse space. In a world where time and space are money - our system realises instant wins in both dimensions.

Before

After

## Useful Extras

We're always thinking of ways to save our customers time and space, so they can make the most of their leisure activities out of work, or business tasks in work. Here's our handpicked list of our most popular add-ons!

### Charge Station - E-bike charger holder

E-bikes are great, but there's nothing more frustrating than deciding to ride and finding your battery is flat, and your charger is nowhere to be found. Charge Station is a simple, elegant solution to that problem, as it can be mounted close to your Stashed Bike Storage System, for easy charging and easy location of your charger!

### Pedal Wraps

If you've ever experienced the savagery of flat pedals, you'll know exactly what we're talking about here! Our pedal wraps come in three useful sizes to accommodate everything from small clipless roadie pedals to large flat MTB 'units'. They will protect you and your bikes in storage and when you're travelling with your bikes too.

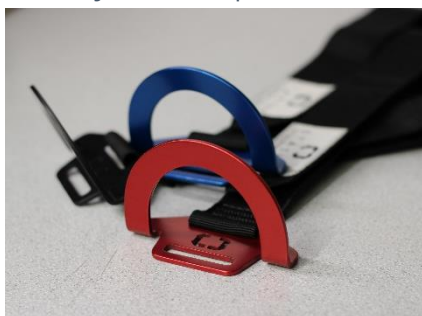

### Double Hooks

Double hooks give you options! Whether it's storing two small kids bikes vertically or using it for extra wheels, or even your muddy riding kit, they are a useful addition for your system.

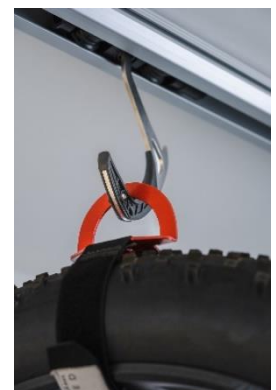

### Fat Tyre Adapter

Our hooks take all tyres up to 3" wide, but for larger tyres up to 5" wide, our Fat Tyre Adapter does the job perfectly.

Strong, stylish and simple to use, it won't let you or your fat bike down.

## Keen to Find out More?

Come and visit us at the Sea Otter Classic 2023

Yup that's right, we're heading stateside in April and will be attending the Sea Otter Classic at Laguna Seca.

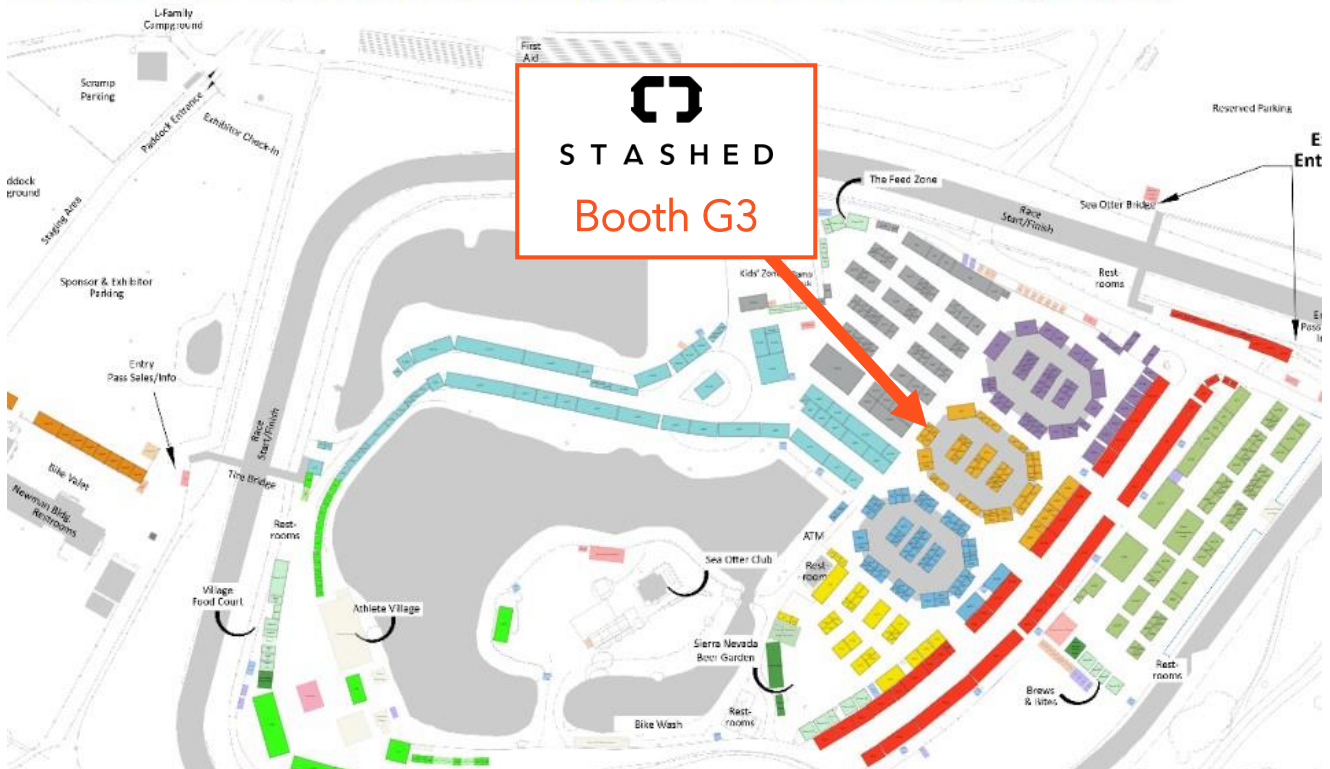

WIN a Four Bike Storage System!

Competition only open to Sea Otter Classic visitors.

Come and visit us at: **Booth G3**

## Advance Appointments

**MONTEREY, CALIFORNIA, USA • APRIL 20-23, 2023**

Our sliding bike storage system is best demonstrated face to face. If you're keen to find out more please email [Elliot@stashedproducts.co.uk](mailto:Elliot@stashedproducts.co.uk) and we'll make sure we set some time aside to show you how our system works.
